

KDFM Optimizer:

A Complete Remote Monitoring System!

Features:

- Cloud-based secure hosting server based in EU
- Independent from the OEM; Manage all brand devices
- Easy deployment on a network
- Meter all "managed" and "unmanaged" devices in a few minutes

Katun® and PrintFleet® are partnering to offer you a complete remote monitoring system, KDFM Optimizer, designed to collect, store and analyze critical printing data from your client's location.

Whether your business focus is supplies, service, or IT, KDFM Optimizer effectively meets the individual needs of sales, service and administrative personnel.

Trust the leaders in the MPS industry to manage your printing device fleet and take benefit of its most recognized features:

➤ Unparalleled Device Information

Thanks to PrintFleet's collaborative relationship with the OEMs, KDFM enables access to all device data including name, supplies status, device status, errors codes, yesterday meter count, serial number, IP address, location, and last active date.

➤ Robust Alert Functionality

Proactively manage your customer print environment, supplies and service. Ensure "just-in-time" toner deliveries and reduce your inventory.

➤ Portal Customization

KDFM Optimizer can be customized to match your corporate brand. Simply add your logo and corporate colors to the login screen.

➤ Comprehensive Reports

Create and edit reports with exactly the information you want and share with other users or email to your customers.

➤ Maps

Your service team know exactly where the devices are located at customer sites. Flashing indicators show you the device status.

➤ Automate Your Billing Process

Using API technology, the export to third party systems has never been so easy.

How Remote Data Collection Works

Automated meter export into your back office ERP system.

Information available on the web 24/7.

Alerts and reports sent automatically via email.

KDFM Optimizer Data Collector Agent (DCA) software application is installed on a non-dedicated server at the client location, and collects critical printing data directly from each device every 30 minutes.

For a minimum amount fee, benefit from the most advanced features of the device management software provider and save time and money to manage your printing devices fleet.

➤ Want to start slowly with a MPS program and connect to your own pace?

Choose our entry-level KDFM Monitor program by PrintFleet® and pay per use with no other commitment.
