# Why Choose a Remanufactured Printer from Katun for Your MPS Network? Greater Profitability!

When a printer in an MPS network needs replacing – or an additional printer needs to be added – choosing a remanufactured printer from Katun makes perfect sense. Why pay full price for a new OEM printer when a remanufactured printer from Katun performs just as well? Beyond the obvious hardware cost savings, aftermarket supplies are not readily available for newer printers – which forces you to pay for expensive OEM toner cartridges, significantly reducing your MPS supplies profit margins. Choose remanufactured printers from Katun and service them using low cost, high-quality Katun toners – then watch your MPS profits grow!

## Trust Katun for Quality

Tens of thousands of office equipment dealers have trusted Katun parts and supplies for decades, so you know you can rely on Katun for high-quality remanufactured printers as well.

Katun Certified remanufactured HP printers are subjected to a thorough remanufacturing process, including the following steps. Do the other remanufactured printer suppliers you're considering follow all the steps below?

Remanufacturing Step	Katun Certified	Other Supplier?
Prior to being remanufactured, all options and features are tested	✓	?
Covers removed, cleaned and painted as required	✓	?
Toner and dust removed from unit using air pressure	✓	?
Solenoids, swing plates, gears, pickup assemblies inspected/replaced if needed	✓	?
Rest of interior unit inspected and cleaned	✓	?
Fuser unit inspected and rebuilt	✓	?
Pickup/feed rollers, transfer roller, transfer belts replaced	✓	?
All painted covers inspected before rebuilding begins	✓	?
Unit is rebuilt	✓	?
All individual options are then tested independently	✓	?
Unit is fully tested, including all trays and MP trays	✓	?
Firmware is updated and page count reset to zero	✓	?
All serial number labels on covers matched to configuration page serial number	✓	?
Each unit is packed with a power cord in a double-wall foam box	✓	?
Box is labeled with part number, description, and serial number	✓	?
