Digital Copier/Printers

Katun PNs: 37080, 37081, 37082, 37083
OEM PNs: See chart on page 2

Enhanced color toners for these popular Canon models provide great color reproduction and excellent value!

These Katun® Performance™ color toners are enhanced versions of our already well-received Katun® Business Color toners that were introduced in 2007. These competitively priced toners still provide OEM-equivalent print quality and performance, *and now provide OEM-equivalent color reproduction*, making them ideal for graphics environments as well as business color environments.

Benefits:

◆ High Quality Output

Katun's enhanced toner formula provides high quality output – satisfying even the most discerning customers. These toners continue to be well suited to business color environments and now also perform well in graphics environments and under demanding conditions.

◆ Excellent Value Worth Waiting For!

Katun has invested substantial time and effort in developing an extremely high-quality product that meets the needs of end-users in graphics environments. Nonetheless, this Katun® Performance™ toner is still very competitively priced and remains an excellent value, offering the quality and performance dealers seek in a more profitable alternative to the OEM toners.

◆ Qualification and Reliability Testing Ensure Quality and Consistency

Like all Katun® Performance™ products, these toners had to pass Katun's 360° certification process. To ensure consistent product performance and high quality, more than one million copies were produced during development and testing. Additionally, production lot samples are tested on an ongoing basis to help guarantee consistency.

◆ Proven Performance

Katun has sold Katun® Business Color toners for use in Canon iR C3200-series applications to thousands of satisfied dealers and distributors since 2007. You can rest assured that we are enhancing an already strong, consistent product that has been well received throughout the world.

◆ Full Compatibility

These color toners have been tested to ensure forward and reverse compatibility, not only with previous versions of the Katun toners, but also with OEM toner.

An Ongoing Commitment to Quality

At Katun, we are continually seeking out opportunities to enhance product quality. We listen to customer feedback and strive to meet customer needs. We search for more effective raw materials, review manufacturing processes and drive efficiencies through the system to provide quality products at competitive prices.

The evolution of this toner is a prime example of that commitment. Katun® Business Color toner for use in Canon iR C3200-series digital copiers was launched in 2007 in a remanufactured OEM cartridge. Rapid market acceptance and popularity of this new toner drove up the cost of acquiring empty OEM cartridges to the point where Katun now offers a new-build cartridge. This, in turn, gives us greater capacity to meet the needs of our customers in a timely fashion - while still providing OEM-equivalent performance.

In addition, customer feedback suggested that more iR C3200 machines than originally projected were being placed in graphics environments. Based on this feedback, Katun developed an exclusive toner formula that performs equivalent to the OEM toner – including color reproduction - even in graphics environments and under the most demanding usage conditions.
