

# Katun<sup>®</sup> Corporation's Print Software Program

Print fleets are changing, creating new opportunities for your business. Print Management is the direction our industry is heading – dealers need to understand the machines they have in the field and how to be cost-conscious in this competitive new arena.

Whether You Are Currently Using Print Management Software,  
or Looking to Source New Software to Better Manage Print Costs,  
**Katun Wants to Partner with You!**

The Print Software component of the Katun Customer Solutions Program, was developed to help our customers utilize print management technology, and to manage print costs through print management software expense subsidies.

**For more information on this program, and its many benefits to you, contact your Katun Sales Representative.**

## **Any print software is eligible for reimbursement!**

- ▶ Monthly subsidy is dependant on individual dealer's monthly commitment.
- ▶ Under the Katun Print Software Program, the dealer is invoiced by their vendor and pays their vendor directly; Katun then issues account credits according to purchase level commitment.
- ▶ Best of all, this program offering can be combined with any of the other Customer Solutions offerings, including BEI Services, to leverage even more credits and discounts from Katun, helping you run a more efficient and effective business!

*\* Due to certain restrictions, not all Katun customers may be eligible for this program. Check with your Katun Sales Representative to see if you qualify.*
