Katun's Automated Toner
Fulfillment Program

With Katun's Automated Toner Fulfillment Program, we'll automatically drop-ship replacement toner directly to your end-user, exactly when they need it. Our software integrates directly with the Print Audit Accelerator and Premier programs, so it's quick and easy. When a "toner alert"* is detected on any of the managed devices, a replenishment order is automatically triggered.

Save Money • Save Time • Reduce Toner Waste • Ensure Customer Satisfaction

Toner Alert	Toner Ordered	Toner Shipped	Toner Received	Invoice Sent

➤ Reduce your inventory costs and save your customer the burden of storing toner cartridges.

➤ Reduce time and effort; you don't need to pick, pack or ship product.

➤ There's no need to monitor the devices; the ATF program does it for you.
You simply choose to either auto-send - or - review, approve and send.

➤ Real time monitoring saves money by eliminating wasted toner; cartridges delivered just-in-time.

➤ Retain captured business – automatic toner fulfillment further secures your customers and helps you maintain high levels of customer satisfaction.

➤ Automatic invoicing plus full reporting on program transactions, delivery, and savings.
