Katun by SCS Filters & Accessories

SCS configures filters with thin fibers in two different weaves to trap specific sizes of particles, and designs filter cartridges for easy installation and safe disposal.

Type 1: Fine Particle Filter. A highly concentrated weave (HEPA media) traps extremely fine particles. The Type 1 filter is designed for cleaning color laser printers, color copiers, and other highly sensitive machines that utilize toners of extremely fine particle size.

Type 2: Toner/Dust Filter. The Type 2 filter efficiently traps toner used in standard copiers and laser printers. It is also ideal for cleaning typewriters and data processing equipment. Type 2 is the standard filter type included with all SCS service vacuums.

SCS Vacuum Accessories are designed to perform their intended tasks safely and efficiently, and are constructed of durable materials that withstand intensive use. Attachments fit all SCS, Ultivac, and Atrix service vacuums.
