## Terms to Know

### **Katun Remanufactured**

Katun remanufactured toner cartridges use recycled toner cartridge bodies along with new toner and select components to produce a high-quality product that will meet or exceed the OEM cartridge's yield and performance.

### **Katun New-Build**

Katun new build printer cartridges are completely new cartridges that have been reviewed for IP compliance while also meeting or exceeding the OEM's yield and performance.

### **Lexmark-Compliant**

Lexmark-compliant printer cartridges are remanufactured cartridges that have been approved by Lexmark for use in Lexmark machines. Many Lexmark authorized dealers and distributors will only buy Lexmark compliant cartridges.

### **Lexmark Business Solution Dealers (BSD) printer**

Lexmark BSD printers are a line of Lexmark printers designed exclusively for their authorized business-to-business dealers. BSD printers and toner cartridges are typically not available through retail channels. Lexmark BSD printers use different toner cartridges than the machines they sell through retail/reseller channels.

### **TAA Compliant\*\***

TAA compliant toner cartridges are cartridges that been manufactured in the United States or in another approved country in accordance with the Trade Agreement Act. TAA compliance is often required for products sold to the US Federal government.

*\*\*Note: All Katun remanufactured Lexmark cartridges are TAA compliant!*
